

Welcome to Maṇa

Maṇa is a web-based application for mental health analysis via social media. Our system uses advanced NLP models to analyze your social media comments and offers personalized guidance.

ManaChat

Get instant, empathetic responses from our chatbot designed to provide quick mental health support and stress reduction tips.

[Start Chat](#)

ManaNow

Dive deeper into your mental health with our detailed assessment. If our analysis shows predominantly negative sentiment, we recommend a full evaluation to help you access professional support.

Upload Your Comments (JSON)

Export your social media comments (Instagram, Twitter, etc.) in JSON format and upload your file below. **Only the "value" field under "Comment" is used for analysis.**

Choose File post_comme... - Copy.json

Upload and Analyze

Sentiment Analysis - Positive: 7, Neutral: 4, Negative: 12

Why Proceed to a Full Assessment?

Our analysis shows that the overall negative sentiment in your comments is higher than the positive. This may indicate that you are experiencing significant stress or emotional difficulties. A detailed mental health assessment can provide deeper insights and guide you toward the appropriate support and resources.
